

Japanese Technology, Made in India

ISE-SUZUKI EGG INDIA

JAPAN'S NO.1 EGG MANUFACTURER

Quality of eggs and Fully Sanitized Hygienic Factory Assures Safety

Ise Foods Inc's Grading and Packing factory
Producing 1.2 million eggs every day from
one factory

Workers are fully sanitized before entering
the working area, which is segregated by
contaminated area and sanitized area.

Hygiene, safety, quality control, reliability

International standard safety

☞ **Machine washed**

☞ **UV sanitized**

**Source: Ise Foods Inc. Ishioka GP factory,
Ibaraki prefecture**

International standard of scientific quality control

Fully automated hygienic factory
and scientific quality control

In Japan egg's freshness is checked by
Haugh Unit test, an international method.
It checks thickness of egg with 3 layers,
Thickness of shell and yolk color.

Temperature controlled factory-Cold Chain

Hygienic factory is kept
at the temperature of 15~20°C

Japanese technology & know-how transferred to India

- 1 Ise Foods' specialist visits India frequently to check quality of feeds, health of hens and water quality that hens drink.

- 2 ISEI GP factory in Noida maintains strict hygienic standard by Ise Foods' management.

- 3 Machine-washed and UV sanitized for the first time in India.

4. Cold chain for the first time in India

**The highest quality eggs, safe eggs:
